Erina Lara
Michael Lamera

The purpose of this document is to propose a change regarding two of the features in the Business Requirements Document.

Features to be changed:
- Playlist
- Ratings and Reviews

Proposed changes:

1. Playlist
   - Removals:
     - Removal of having playlist contributors
       - Users would not be able to allow other users to edit the contents of their playlist
       - Note that users will still have the ability to make their playlist public or private, and can share private playlists using a URL
     - Removal of playlist email notifications
       - Users would not be able to choose to receive email notifications on a certain playlist
   - Reason for change:
     - The team is currently behind schedule according to the project plan, and do not think the features will be finished in time
   - Impact of change:
     - Changes to documents:
       - Removal of respective business rules in Business Requirements Document
       - Site Map: Edit UI for Playlists
     - Business rules (The following business rules will no longer be applied if the contributors feature is removed):
       - Users can share playlists by adding contributor's account email to the Playlist's contributor list
       - Users that are added as a Contributor to a playlist can receive email updates when someone updates, adds, or removes from the playlist
       - Users must select whether a contributor is a Viewer or an Editor
       - Contributors that are removed from a playlist will not be able to edit the playlist and will only be able to view the playlist if the playlist is public
       - Playlists can have an unlimited amount of contributors
       - Users that created the playlist can change contributor permissions at any time

- User can choose to opt out of playlist email notifications, only if the playlist is shared with at least one other user or contributor
  - Non-functional Requirements:
    - Playlist email notifications will be sent within 1 minute
    - Users will be added as a contributor to a playlist within 5 seconds
    - Contributors will be removed from a playlist within 5 seconds
    - Contributor permissions will be changed within 5 seconds
    - User is opt-ed out of playlist email notifications within 5 seconds

2. Ratings and Reviews
   - Changes:
     - Users can rate titles on a scale from 1-5, in whole increments, rather than half increments (as stated in initial approved proposal)
       - Users would not be able to rate a title in half increments (such as 1.5, 2.5, etc)
       - Users will only be able to rate a title in whole increments (1,2,3,4 or 5)
       - Note that users will still the ability to rate a title
   - Reason for change:
     - The team is currently behind schedule according to the project plan, and do not think the features will be finished in time
     - Due to untimely setbacks and core requirement implementation delays, the delivery for the expected business rule without the proposed change may require additional time past the proposed deadline
     - To ensure timely completion, the change of requiring whole increments rather than half increments is proposed
   - Impact of change:
     - Changes to documents:
       - Change of respective business rule in Business Requirements Document
     - Business rules (The following business rules will be changed if the change is approved):
       - Users can publicly rate titles on a scale from 1-5, in half increments

     - Non-functional Requirements:
       - No non-functional requirements are necessary to be changed or removed

- The proposed change will not affect the Ratings and Reviews non-functional requirements
